|
├─ database/
|   └─ create_tables.sql → users, favorites, meal_plans, shopping_list
|
└─ README.md           → project documentation

```

PHP

Possible **new** structure? (would need to tell apache to that the webserver lives in **/public**)

```

├─ database
|   └─ create_tables.sql
├─ public <-- front end
|   └─ assets

```

```
| | └─ css
| | | └─ auth.css
| | | └─ header.css
| | | └─ planner.css
| | | └─ recipe-cards.css
| | | └─ shopping-list.css
| | | └─ style.css
| | └─ js
| |   └─ favorites.js
| |   └─ mealPlanner.js
| |   └─ recipes.js
| |   └─ shopping.js
| └─ favorites.php
| └─ Home.php
| └─ index.html
| └─ Login.php
| └─ logout.php
| └─ meal-planner.php
| └─ recipe-details.php
| └─ Recipes.php
| └─ Register.php
| └─ Shopping-list.php
└─ README.md
└─ src <--- backend
    └─ auth
        └─ checkSession.php
        └─ handleLogin.php
        └─ handleRegister.php
    └─ db.php
    └─ recipes
        └─ addToMealPlan.php
        └─ loadFavorites.php
        └─ loadMealPlan.php
        └─ saveFavorite.php
    └─ shopping-list
        └─ addIngredient.php
        └─ getList.php
        └─ removeGroup.php
        └─ removeIngredient.php
```
